

EBITIMI IFESHILE EBELIKE

Full-Stack Developer | Java & Spring Boot

Lagos, Nigeria | +234 810 051 1776 | ebelikeebitimi6678@gmail.com

Portfolio: timidbdev.vercel.app | GitHub: github.com/Ebitimiebelike | LinkedIn: linkedin.com/in/ebitimi-ebelike-23469836a

SUMMARY

Full-stack developer building production backend systems in Java and Spring Boot alongside React/Next.js frontends. Shipped a real-time messaging platform with WebSocket/STOMP and an offline-first accessible learning app with a from-scratch handwriting engine.

Currently a Frontend Developer at Deexon Solutions.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, SQL, Go

Backend: Spring Boot, REST APIs, WebSocket/STOMP, JWT Authentication, JPA/Hibernate, Node.js, Express.js

Frontend: React, Next.js, React Native, Tailwind CSS

Databases: MongoDB, PostgreSQL, MySQL

Tools & Platforms: Git, GitHub, Drizzle ORM, Vercel, Railway, Render, Cloudflare R2

Concepts: OOP, API Design, Authentication & Security, Offline-First / PWA, Testing (JUnit, Vitest)

EXPERIENCE

Frontend Developer — Deexon Solutions

Jul 2026 – Present

- Built the production marketing website for SolarHouse NG end-to-end (Next.js 16, React 19, TypeScript, Tailwind CSS v4), working from the client's social media alone with no design files provided.
- Added a shop page with WhatsApp-based ordering and a PostgreSQL/Drizzle-backed quote request system; now own ongoing maintenance and feature work on the live site.

SELECTED PROJECTS

Ping — Real-Time Messaging Platform (In Progress)

Spring Boot · MongoDB · WebSocket/STOMP · Next.js · TypeScript

- Full-stack messaging app with JWT-secured REST APIs and WebSocket/STOMP powering live chat, presence and read receipts.
- Built a security-hardened media upload pipeline and fail-closed access controls, backed by 26 JUnit tests.

LearnTogether — Offline-First Accessible Learning PWA

Next.js 16 · TypeScript · IndexedDB · Servist · Vitest

- Accessible learning app built around a real learner with cerebral palsy, including a custom finger-tracing engine written from scratch in TypeScript.
- Fully offline via service worker precaching, with state persisted in IndexedDB and 340+ tests covering the app.

ApexHomeStores — E-Commerce Platform

MERN Stack

- MERN e-commerce platform with product management, cart and RESTful APIs; responsive UI deployed to Vercel.

EDUCATION

NIIT — Software Engineering Program

Expected April 2027

Semester 3 · Current focus: Enterprise Development with Java & Spring Boot
